

## **Inspection and Damage Claim Procedures**

Prior to signing a delivery receipt for any of Southern Steamers Alumigrill Trailers, please inspect for damage. If there is any physical damage that can't be repaired by replacing a part, do not accept without our authorization. In other words, we can ship a fender, light, wiring harness, or step via UPS to make minor repairs. Any other damage that you are not willing to accept on a permanent basis, such as fork lift damage, trailer frame damage, or something similar that would require third party assistance to repair, please call me at my 24/7 contact number 1-912-658-9291. I will respond immediately and provide assistance with the decisions necessary to complete the process.
